

AIR POT DRAINAGE TRAYS

G-Pots are the first dedicated drainage trays designed specifically for Geopots or any brand of air pruning pot (fabric or plastic).

G-Pots have multiple formats of use, provide exceptional value and offer design features like no other drain tray.

G-Pots come in two sizes: 480mm (up to 38L/10Gal) and 550mm (up to 76L/20Gal). Both sizes are 150mm high and provide ample drainage and controlled flushing of your medium.

Flip one G-Pot over and lock in another on top to form a stable pot stand & drain tray system.

G-Pots can be used by themselves - or with a Pot Grid insert for maximum drainage and air exposure to the entire air pruning pot (including the bottom).

G-Pots provide the complete indoor potting solution with the addition of the interlocking Trellis (SCROG) Kit.

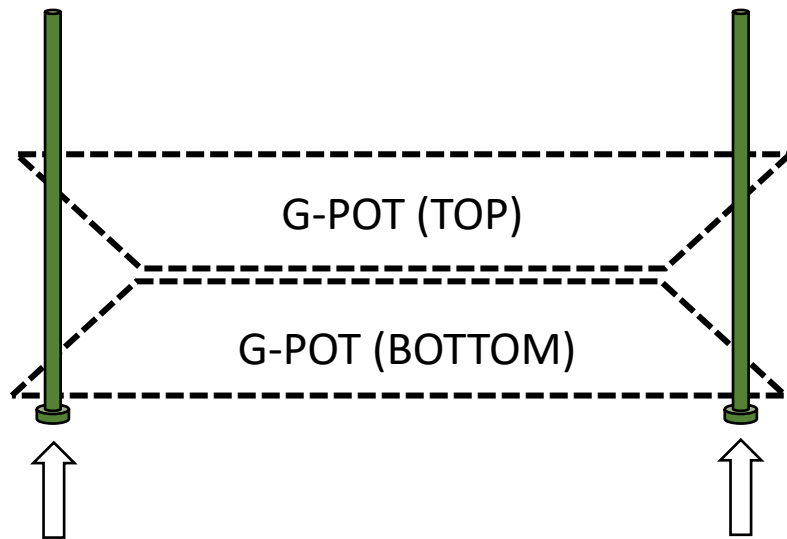

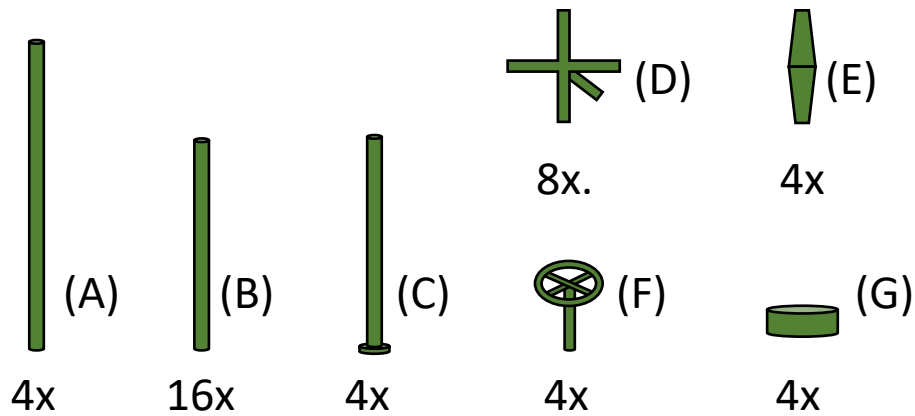

WITH G-POTS THE CHOICE IS YOURS!

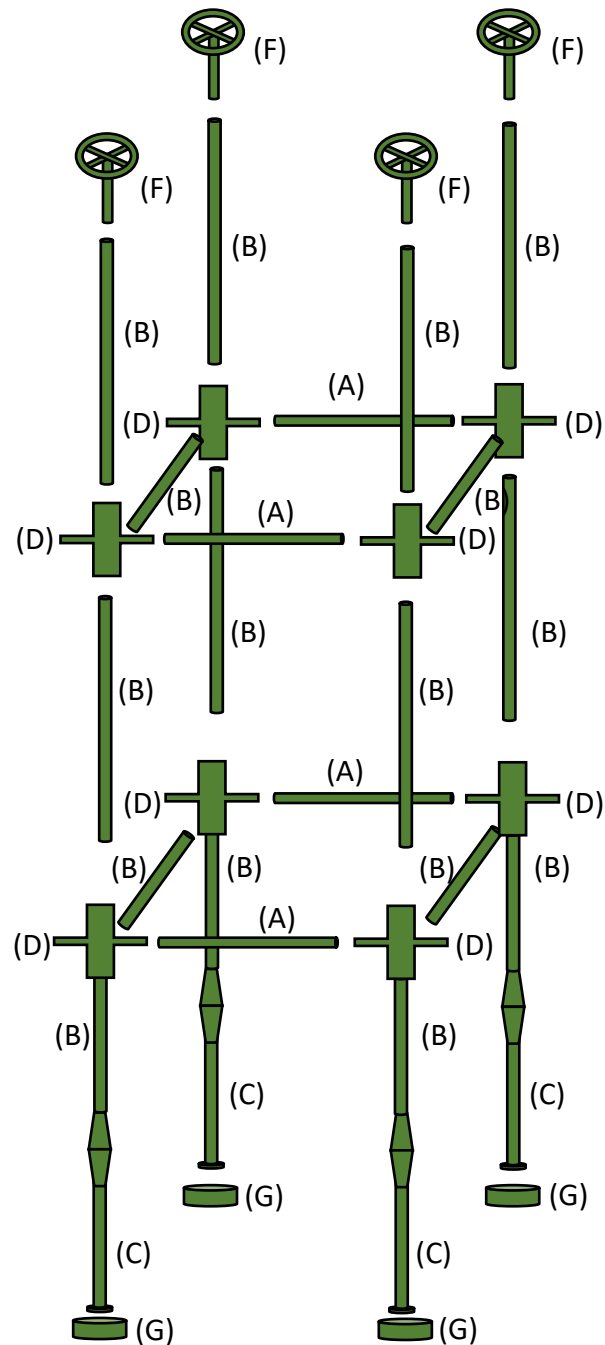

Pot Grid Compatible

Easy To Store And Transport

Interconnecting Trellis Kit Option

PLEASE ENSURE PART (C) IS FEED THROUGH FROM THE BOTTOM OF THE CORNER GUIDE HOLES ON THE BASE POT BEFORE ASSEMBLING.
