

# mills

Mills is a state of the art nutrient line designed to ensure flowering plants receive complete nutrition effectively and efficiently. The Mills line was developed through a decade's worth of research in the laboratory and application in the field. The proprietary bio-mineral formulas are simple and easy to use in all growing styles and are guaranteed to produce the finest fruits and flowers time after time. From seedling to harvest, Mills is the ideal partner for growers of all levels.

VITALIZE is a premium quality fertilizer that contains increased levels of phosphate and potassium to optimize the growth of plants from seedling to harvest. The result? A greener, healthier and stronger plant that'll produce a phenomenal yield. Vitalize Alleviates the amount of abiotic stress, such as temperature, water and salinity stress

START is a complex bio-stimulant nutrient additive, meant for use during the seedling, growth and early bloom phases of all plants. START contains a highly available form of Nitrogen and a unique combination of bio-stimulants which act as a root stimulator while promoting plant vitality and abundant branching. START is immediately absorbed by the plant and is perfect for proper development of seedlings, rooted cuttings, young plants, and use during transplant. START is responsible for:

- Fast and strong development of roots
- Promotion of plant growth and vitality
- Improvement of media structure and nutrient absorption
- Rapid recovery from transplant shock

BASIS A & B is a highly concentrated bio-mineral base nutrient designed to bring optimal nutrition in both the vegetative and bloom stages of all plants. BASIS is designed so the plant can easily absorb everything needed within a wide pH range. This two-part nutrient is suitable for all growing styles (soil, coco & hydro) and is incredibly easy to use. Compatible with all growing mediums and watering methods.

C4 is a sophisticated blend of macro nutrients, micro nutrients, bio-stimulants, carbohydrates, and trace minerals guaranteed to give the grower heavier and higher quality yields. The potent bio-stimulants in C4 cause the plant to produce massive amounts of essential oils and sugars.

C4 is responsible for:

- Quicker and more abundant fruit set
- Promotion of plant growth and vitality
- Increased oil and sugar production
- Development of denser, harder and heavier fruit and flowers

ULTIMATE PK is a powerful heavy weight bloom booster designed to be used the last 2 to 4 weeks of the bloom stage. The superior composition of ULTIMATE PK provides the plant with all the nutrients needed during ripening for more abundant fruit set, hard cell structure and the best possible flavor and aroma.

ULTIMATE PK is responsible for:

- Larger and harder fruit and flowers with the best possible aroma and flavor
- ULTIMATE PK is the "ultimate" bloom booster on the market today!
- Compatible with all growing mediums and watering methods
