WILMA DRIP IRRIGATION

Growers who love growing in pots with coco or soil can save them time and get bigger yields with the Wilma.

As growers get more confident they can use mixed media or even 100% pebbles in the Wilma.

A timer controls when nutrient solution is dripped into the pots. Run-off drains back into the reservoir and drips back into the pots at the next feed.

System	Dimensions L x W	Pot options
Wilma XL 4	90 x 90cm	4 x 18L pots

All Wilma tanks are 20cm high
