

The Enhancer

TNB CO₂ Dispersal Canister

TNB Enhancer is a completely natural Carbon Dioxide (CO₂) generator, offering a safe and efficient method for CO₂ supplementation. Utilising the natural process of photosynthesis, The Enhancer initiates the

distribution of CO₂ shortly after activation, effectively supporting plant growth. Once activated it produces a surge of CO₂, reaching levels of up to 1200 PPM (in a 4 x 4 x 4 meter space), and remains effective for up to two weeks.

- Always Fresh
- Water Activated
- Hits High PPM's
- Inexpensive Start-Up
- Doesn't Produce Heat
- No Equipment Needed
- Slows CO₂ Release at Night
